

Sciency Stuff for BOLT Vacation Bible School:

DAY 1: This is simple! Jesus taught us that God's words are like seed that get scattered on the ground. Those seeds that go to good soil will grow and make beautiful things happen!

1. Place a saucer under each pot. Place the Wonder Soil wafer into each pot. Slowly DRIZZLE (don't pour to avoid leakage) 1/2 cup of water into each pot. Let the pot sit for a few minutes.
2. After the wafer has expanded, stir the soil with the wooden stick and plant 4 seeds by pushing them gently into the Wonder soil as in the picture.
3. Keep your pots near a window or on your porch.
4. It is up to you to keep the pots moist so the seeds will sprout. Be a good disciple and water your pots regularly. When the plants are bigger, you can transplant them, pot and all into your garden
